Introduction

At the IPC7 in 1998 Digital Creations announced, that their state of the art Web development Platform would become Open Source. Shortly thereafter it was named Zope. We took this as the initiative to speed up our plans for developing a Web Mail client and Personal Information Management web application for Linux.

1. What is worldpilot

Worldpilot is a web based organizer framework for Personal Information Management applications. At the time of writing it already combined the following applications:

- IMAP based web mail client
- Contact management
- Calendar and Event management
- To Do lists
- Notes
